Meeting 8 notes

Gabe M Yawitch

12th December 2023

1 To do list

- ~~Try to vectorise the functions~~

- ~~Plot histograms of sigma, adc, axr, axr prime and signal to see if simulations look as expected.~~

- Use the scipy.optimize.minimize function for the nlls fitting to see if I can recreate the signal that way

- ~~Plot loss against epoch, will be useful in my report~~
